

New Innovative ITEC courses

(i) " Corporate Governance for a Better Tomorrow" (10-21 Nov, Kolkata) : This course is being delivered by a new ITEC training partner, the ICSI, which is the statutory regulatory body for Company Secretaries in India. Company Secretaries are legal compliance officers in the corporate structure of any company (profit/non-profit) and as such constitute an important class of professionals. Many jurisdictions may not have company secretaries designated as such, and authorise legal professionals to discharge similar roles. This course is part of DPA-II's modality ITEC-Professional, which aims to reach out to various categories of professional services outside the government domains. Courses for chartered accountants through ICAI were initiated last year.

(ii) Mid-Career Training Programme on Public Policy and Governance for Civil Servants of African Countries (6-17 Oct 2025, NCGG) : This MCTP-like training programme is focused on sharing India's good governance models. Usually this course is offered in a single-country format; this time it is being offered in a multi-country format for African countries.

(iii) " Forest Dwellers: Developmental challenges and Solutions" (Nov 3-14, 2025, Raipur): This is an innovative ITEC course focussing on development administration for forest dwellers; it is perhaps the first of its kind course in this segment. The course is being conducted by the state training academy at Raipur in Chattisgarh, which is known for its rich tribal traditions. The course will not only provide an immersive experience on tribal issues, but will also coincide with Janjatiya Gaurav Diwas celebrations.
